

Choko Tree Goals

Energy:

Our energy requirements will be captured, developed or generated on the property

Water:

All rainwater falling on the property will be captured, we will reduce our consumption of town water to as low a level as possible.

Food:

Our food will be produced *on the Choko tree farm* organically sufficient to contribute to two meals a day for the two of us, *foods unable to be produced will sourced organically*

Waste:

No waste shall leave the property, *and we shall aspire to a 'Zero Waste' lifestyle.*

Community:

We will work within our community to help others live more sustainably

Livelihood:

We will generate our income ethically

Amenity

We shall continue to develop the property to make it more liveable.
